

-WAP-, i-mode™- & PDA-Emulator -

The MobileRunner PRO is a web-based emulator that allows you to comfortably browse **WAP, i-mode™ and PDA portals**.

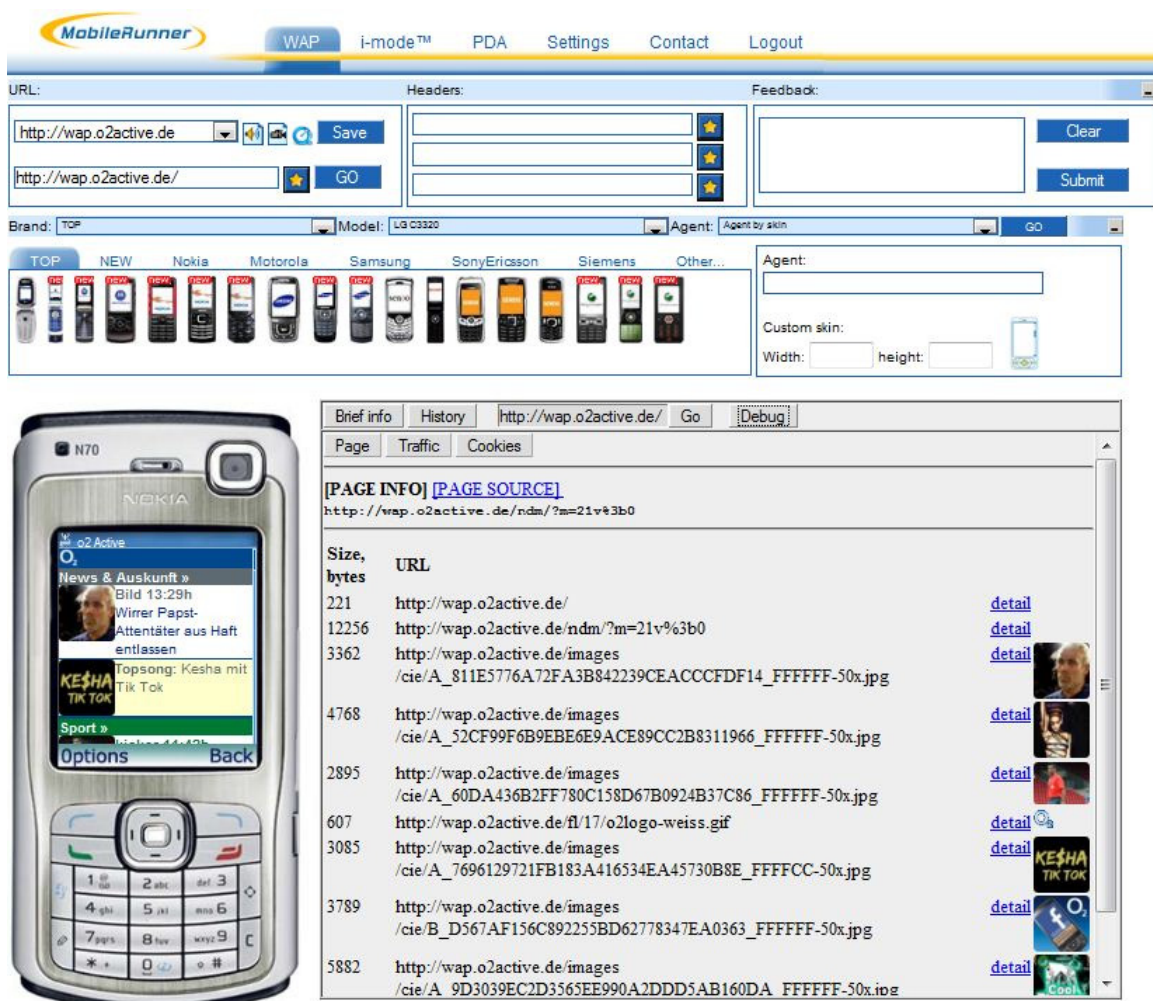

With this testing tool you can **test and optimize your mobile portal** with a wide range of handset devices (currently more than 300 handsets and over 900 different user agents), thereby *improving quality, saving significant time and consequentially a reduction of costs*.

Not only can you observe your own portal with the MobileRunner, you can also view the services your competitors are currently offering.

Test your Mobile Services ...

Benefits:

- Optimize your mobile portal
- Improve the quality of your mobile services
- Save significant time and costs
- Browse all open mobile portals
- Make screenshots from your applications on any device for presentations
- Permanent updating of new devices
- Over 300 devices and 900 user agents

The screenshot displays the MobileRunner PRO interface. At the top, there are navigation tabs for WAP, i-mode™, PDA, Settings, Contact, and Logout. Below these, there are input fields for URL, Headers, and Feedback. The URL field contains 'http://wap.o2active.de'. Below the URL field, there are fields for Brand (Nokia), Model (LG C3320), and Agent (Agent by skin). A row of mobile device icons is visible, including Nokia, Motorola, Samsung, SonyEricsson, Siemens, and Other... The main content area shows a simulated mobile screen with a news article titled 'News & Auskunft' and a list of resources. The resources list includes the following items:

Size, bytes	URL	detail
221	http://wap.o2active.de/	detail
12256	http://wap.o2active.de/ndm/?m=21v%63b0	detail
